Info about the product

Thank you for purchasing our Eagle Lite FALCON 270Z. The manual below will review the product's features and functions.

Product Features

The Eagle Lite FALCON 270Z is a Wall wash of tour ready quality The Falcon series is made for high output, ready for any weather and easy connectivity.

- 18X15W RGBW Led
- 42x0.2W Background Led
- Zoom 7° - 58°
- Pixel control in the form of 3 separate rows
- Easy to set up and set up with the clear LCD screen.
- Built-in Auto shows for a neat standalone effect.
- Selectable dimmer curves, via Menu or DMX
- Master/Slave mode, med auto shows
- IP65 Rated so plenty of opportunity for outdoor use.
- W-DMX Wireless DMX Module
- Possibility of using barn doors and diffusers (45,60,90°)

General information before use

Accountability and attention are requested when using the device.

With high-voltage electricity, there is a danger of shock when touching exposed wires.

Risk of eye damage

Never look directly into the light source. Always wear protection if it is necessary to look directly into the light source.

Always check that you are using the product correctly!

Correct voltage in relation to the specifications specified on the device or manual. Be sure that the device is always grounded. Never open the unit until power is taken off! Check periodically that the cord is not pinched or damaged of any kind. Always check the device and cord time to time. When replacing a fuse, it must be replaced with the same type and rating.

For your own safety and understanding of the device, we strongly recommend that the manual be read through before using the product. Always read warnings and recommendations before use.

Warning: Hot surface

This symbol indicates that the device may become hot in certain places on the device. The device may become hot during use. Therefore, it is recommended to let the device cool for at least 10 minutes after use. In this way, injury is avoided and best cared for on the device.

Should only be operated by qualified persons.

We strongly recommend that all persons who will be using the device do the following, read the manual before using the device, are qualified to use the device, and can rig equipment properly.

Safety instructions

Uses

- This device is an LED projector for creating decorative lighting effects. The device is designed for professional use in event technology, such as on stage. It is not suitable for household lighting.
- Use the device only in accordance with the instructions herein. Damage resulting from failure to comply with this manual will void the warranty! We accept no liability for any resulting damages.
- We accept no liability for material and personal damage caused by improper use or non-compliance with safety instructions. In such cases, the warranty/warranty will be void.
- Unauthorized modifications or modifications to the device are not permitted for safety reasons and void the warranty.

NR: 401120
Wall Washer

Danger from electricity

- The unit is suitable for indoor & outdoor use. Can be used outdoors as the device is IP65 rated.
- To reduce the risk of electric shock, do not open any electrical parts.
- The unit must only be opened in extreme emergencies in connection with the removal of external objects or repairs, always consult with a workshop in this area.
- Just connect the device to a properly installed outlet. The outlet must be protected by a circuit breaker (RCD). If the wire is equipped with a grounding switch, then it must be connected to an outlet with a protective ground. Never remove the protective grounding of the wire. Removing the ground wire may result in damage to the device and possibly injure the user.
- Never touch the device with wet or damp hands. There is a risk of potentially fatal electric shock.
- Unplug the device during a thunderstorm, when it will not be used for an extended period or before cleaning.

Instructions for using the device.

- The specified working temperature of the device is 5 to +45°C. Do not operate the device outside this temperature range.
- The device can grow up to 65°C during use. Avoid contact with people and materials.
- The device should have at least 50 cm to the nearest surface.
- Do not use the device near flammable materials. Always place the device in a place where adequate air circulation is ensured. Leave 50 cm of free space around the device. Never cover the vents of the unit.
- Use the device only in a moderate climate, never use the device outside the specified working temperature.
- Do not look directly at the light source. People with photosensitive epilepsy may suffer from epilepsy attacks or incur other injuries.
- Make sure that the product is set up or installed safely and expertly and prevented from falling. Comply with the standards and regulations applicable in your country, especially EN 60598-2-17.
- Eagle Lite cannot be held liable for damage caused by incorrect installations or inadequate security.
- When using the unit overhead, the unit must always be secured with a safety weigher or safety net.
- Make sure the area below the installation site is blocked when rigging, derigging, or servicing the device.

Service and maintenance of the device.

- The device is not designed for permanent operation; therefore, it is important to the device for consistent operational breaks. This helps to ensure service life without defects.
- Never turn the device on and off at short intervals. This will significantly reduce the service life.
- If the device has been subjected to drastic temperature fluctuations, do not turn it on immediately. The arising condensation can destroy the device. Allow the device to reach ambient temperature before connecting. Wait until condensation has evaporated.
- After use, the unit must always be allowed to cool before it is derigged if this is not complied with, and the unit is subsequently defective. The warranty does not apply.
- Please use the original packaging to protect the device from vibration, dust and moisture during transport or storage.

FALCON 270Z
18X15W RGBW LED ZOOM
NR: 401120
Wall Washer

- If a serial number label is affixed to the device, do not remove the label as this will void the warranty.

Cleaning and maintenance

The outside of the device should be cleaned periodically to remove contaminants such as dust, etc. Especially the lens must be clean to ensure maximum light output. In addition, it is also recommended to check for other foreign objects in the device.

1. Disconnect the power and allow the device to cool down before cleaning.
2. Clean the surface with a soft, lint-free and damp cloth. Never use alcohol or solvents, as these can damage the surface. Make sure that no liquid can get into the device.
3. The device must be dry before the power is reconnected.

There are no repairable parts inside. Do not open the housing. Do not attempt to repair the device, as this may result in damage. Maintenance and service operations may only be carried out by authorized repairers. If you need spare parts, please use original parts. Should you have any further questions, please contact your dealer.

Wall Washer

Setup

Unpack and check carefully for any transport damage before using the device. Keep the packaging or use custom flight cases for it.

To fully secure the product against vibration, dust and moisture during transportation or storage, it is recommended to use the original packaging or your own packaging material suitable for transportation and storage, respectively.

Warning of the risk of overheating.

The distance between the Device and the illuminated surface must be more than 1.5 m (19.7 inches).

Adequate ventilation is very important.

The temperature around the device should never exceed 45 °C (113 °F).

When using stands, structures etc.

When mounting the device on a tripod, ensure that the stand is in a secure and stable position and that the weight of the device does not exceed the maximum allowable load capacity of the stand.

Possible source of error for data errors

To ensure flawless operation, use dedicated DMX cables and not regular XLR/microphone cables.

Never connect the DMX input or output to audio equipment such as mixers or amplifiers. As this can cause great damage!

Possible damage to the device associated with moisture.

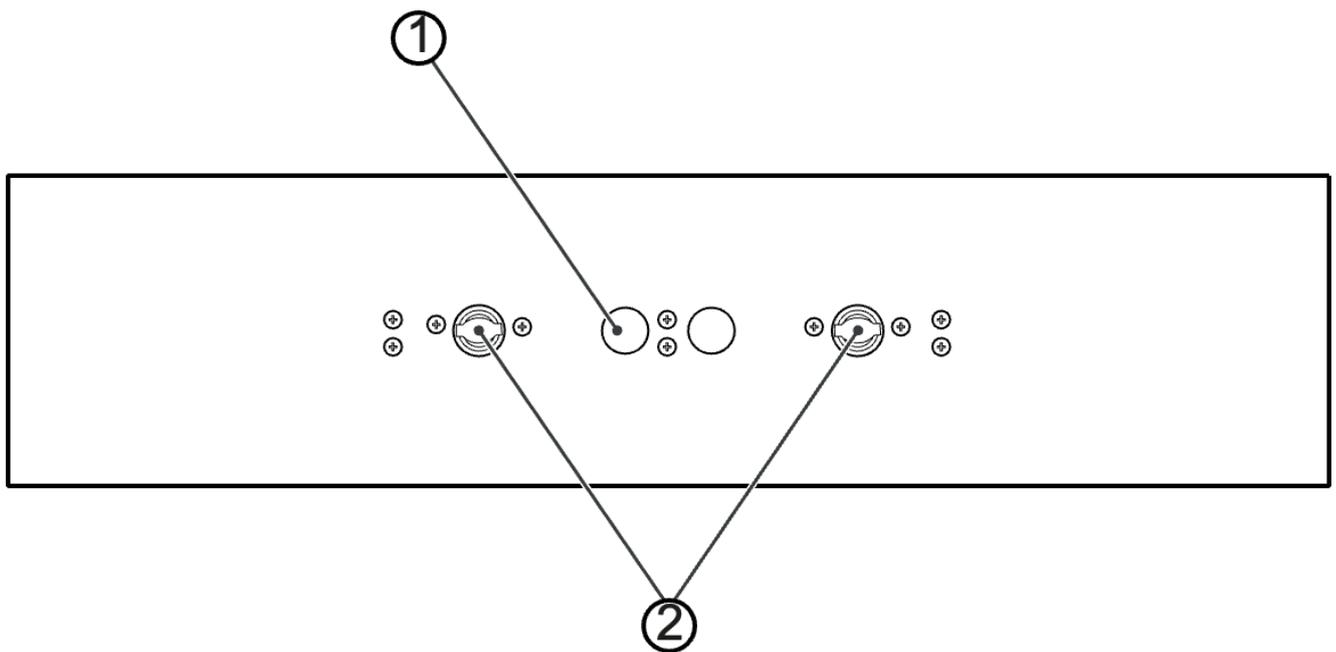

Moisture that can enter open (plugs and couplings) by DMX or power cables can cause short circuits. Therefore, it is very important that the lid is closed if the plug is not being used, and only use IP65 rated connectors Cables etc. Available as an accessory at (www.eaglelite.dk)

Mounting options

The quick lock brackets on the underside of the unit are intended for use with the associated Omega 1/4 bracket, on which a clamp or bolt should be mounted for suspension or fastening. Safety weighers must also always be used, the safety weigher must go through the two holes that are also indicated in the drawing below.

The unit can be mounted/used hanging or standing on its built-in feeder.

1 Eyelets for mounting safety weighers

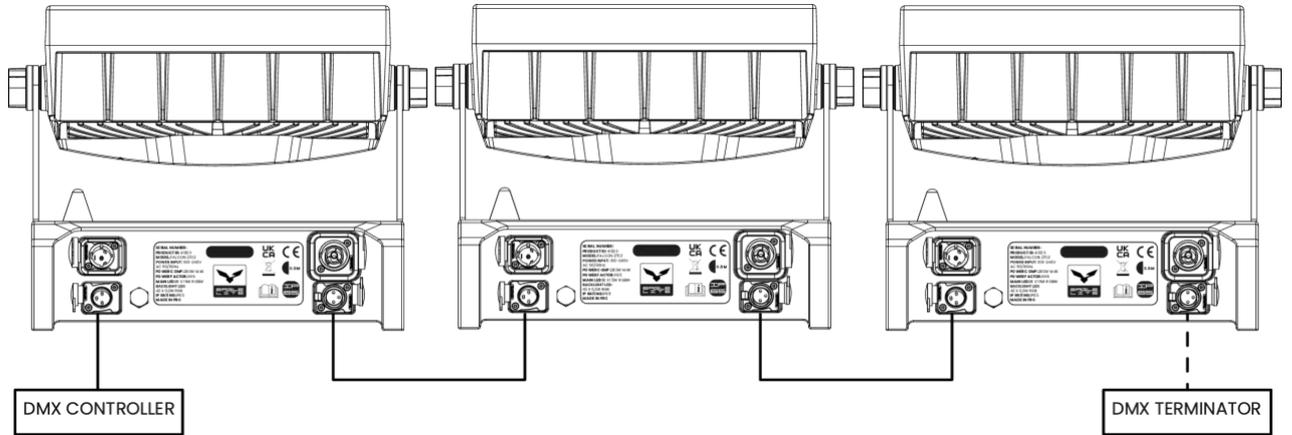

2 Quick Lock Mounting Eyelets

DMX Options & Setup Guide

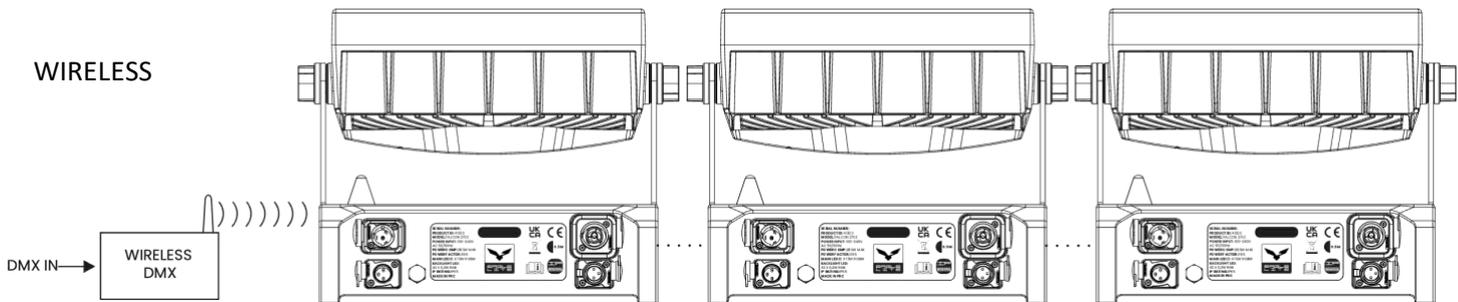

DMX TO DMX

WIRELESS TO DMX

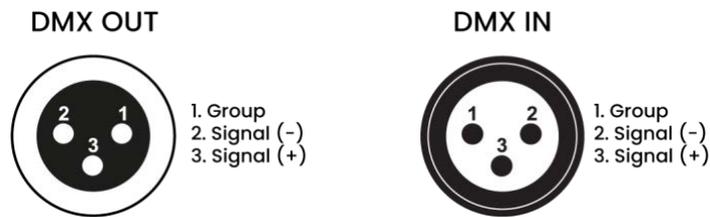

WIRELESS

Explanation of DMX Connections

If you use the DMX controller for this device, you can connect the DMX controller's DMX output directly to the DMX input on the first device in the DMX chain. If you want to connect DMX control with other XLR outputs, simply pull cables from the output on the device and thereby link further.

Connect the DMX output of the first device in the DMX chain with the DMX input of the next device. Always connect an output with the input of the next device until all devices are connected.

DMX-512 setup with DMX Terminator

For installations where the DMX cable needs to be pulled over a long distance, or is in an area with a lot of electrical noise, such as a disco, larger productions, or other, it is recommended to use a DMX terminator. This helps prevent interference with the digital signal by electrical noise.

The DMX terminator is simply an XLR connector with a 120 resistor/ohm connected between pins 2 and 3, which is then plugged into the XLR output of the last device in the chain.

Master/Slave mode

When you put a group of FALCON 270Z units in 'Master/Slave' mode, the first unit will control the others. This feature is particularly useful for starting a show without much programming. Connect the DMX output from the master unit to the DMX input of the first slave device. Then you connect the DMX output from the first slave device to the DMX input of the second slave device, and so on.

FALCON 270Z

Wall Washer

Power setup

Proper current and voltage are very important for the proper functioning of the device.

The FALCON 270Zrun on 100 to 240-volt AC (+/- 10%, auto adjustment). The device includes an automatic power supply for adjusting voltage.

Proper connection

use it included power cable or one of the same ratings. When using another cable, it is important that the following is observed.

Cable color	Connection explanation	International characters
Brown	Plus	L
Blue	Minus	N
Yellow/Green	Earth	

Accessory

Included

- 1X Omega 1/4 Turn Clamps
- 1x Truecon power cable

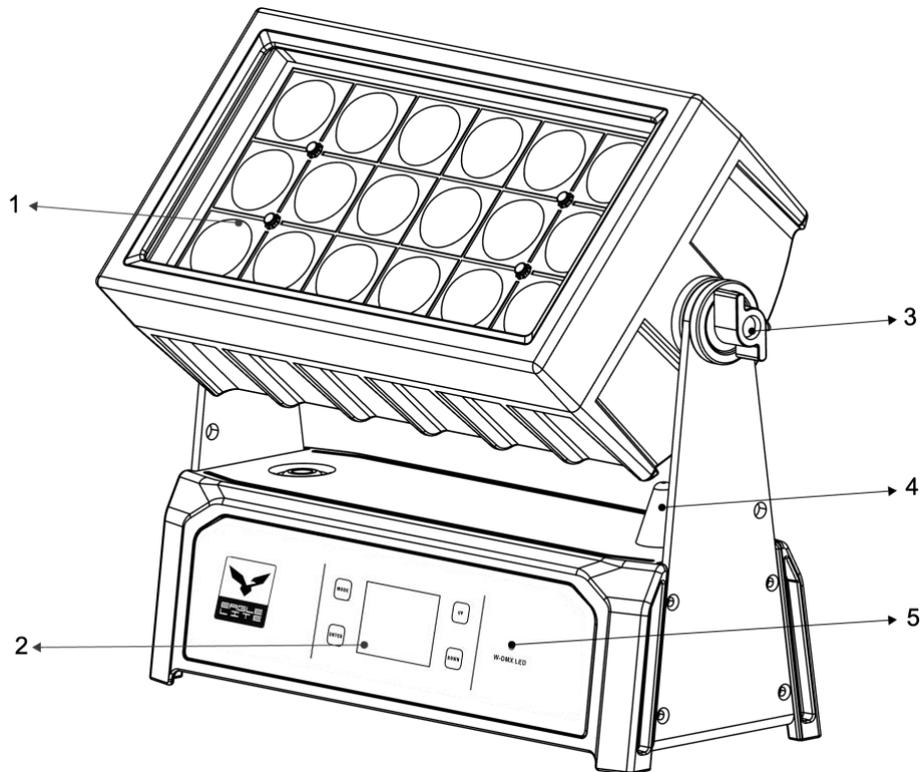

Accessories that can be purchased

- MAG diffusers 45,60 & 90 graders
- Barndoors
- Truecon combination cables, with DMX and power in one cable, are available in 3, 5 and 10 meters, other dimensions can be made on order.
- 2in1, 4in1, 6in1 Flight case with space for accessories in the middle.

Screen behavior in DMX Mode

On the top line of the display, DMX (DMX 3Ch, 4Ch1, 4Ch2, 5Ch, 16Ch1, 16Ch2, 22Ch, 34Ch) is displayed, and the DMX starting address is clearly displayed in the center (for example, DMX34Ch and ADDRESS 001). As soon as the DMX signal is interrupted, the display starts flashing; if the DMX signal is present again, the display stops flashing.

If the unit is controlled by W-DMX, [W-DMX LED] flashes on the front of the unit. On the screen, the strength of the signal can be seen.
